ABSTRACT

EAZY is building a Mobile Masternode Platform to manage your Masternode portfolio with the same ease and simplicity as checking your emails. The main objective of EAZY is to bring Mastermode management to the masses, so that Masternode coins become more than just a Fringe sector of the Cryptocurrency community. The Whitepaper is intended to give an overview of our approach, and how we intend to achieve this objective.

The paper describes the unique value proposition and key innovations of the EAZY ecosystem from an academic and theoretical perspective, and captures the unprecedented growth in the number of digital assets services in the past as well as the future.

EAZY is driving positive change and offers a safer, faster and easier entry point into the Masternode space. It's Masternodes made EAZY!

DISCLAIMER

PLEASE READ THIS DISCLAIMER SECTION CAREFULLY.

All technical aspects in this document define main features of the EAZY Mobile Management Platform as well as the state of current and future development. The products and innovations set out in this whitepaper are currently under development/ under future development. EAZY makes no warranties or representations as to the successful development or implementation of such technologies and innovations, or achievement of any of the other activities noted in this paper, and disclaims any warranties implied by law or otherwise, to the extent permitted by law. This whitepaper is for informational purposes only and is not a statement of future intentions. No information in this white paper should be considered to be business, legal, financial, or tax advice. You should be aware that you may be required to bear the financial risk of any purchase of EAZY Assets for an indefinite period of time. If you are in doubt you should always consult legal or financial or other professional advisor(s).

INTRODUCTION

There is a growing number of Masternode coins, with multiple new projects launching every day. There were less than 80 Projects listed on masternodes.online (leading desktop Masternode monitoring platform) at the end of 2017. Now there are over 400 Masternode projects listed! The number of Masternode projects increased 500% in less than a year. But what is a Masternode, and why is there so much interest in Masternodes?

Masternodes are a key component in the technology of a growing subset of Cryptocurrencies. The validity of each Cryptocurrency's coins is provided by a distributed ledger, also known as a Block chain. A Block chain is typically managed by a peer-to-peer network consisting of full or light nodes (EG. (Mining) Wallets) where all recorded transactions are distributed equally through the block chain and cannot be altered retroactively without the alteration of subsequent blocks.

A nodes job is to enforce the rules of a block chain network without the possibility of being altered or modified in any form. Similar to full nodes, Masternodes are a special type of server that secure a block chain's network to take over specific services that miners under proof of work cannot accomplish. First implemented in DASH, we are currently seeing the fourth generation of Masternodes with great success from a technical standpoint, implementing features like POS 4.0, Zerocoin, SwiftTX, and Multisend. These features have turned Masternodes into a real investment asset with real adaptation and use-cases, all while being more efficient than traditional Proof of Work Cryptocurrencies.

Masternodes were first introduced into the Cryptocurrency sector with DASH as an improvement to weaknesses in network security by utilizing a broad range of functionalities and operations for stakeholders including instant payments, private messaging, anonymous transactions and many more. As a reward for providing these valuable services to the network, Masternode operators are

compensated in the form of block rewards. The percentage differs from project to project, where some Masternodes give from 5% to 95% of the block reward. Putting little variances of these projects aside, most Masternode projects are essentially the same.

Unfortunately many Masternode holders and investors are aware that setting up a Masternode is a tedious task- installing scripts and following half finished set up guides that leave you with more questions than answers. For a regular investor with no IT-related knowledge or back, this can be a painful and confusing experience.

EAZY wants to change that!

OUR VISION

Our vision is to create a Mastertool solving all Masternode investors biggest problems when managing their portfolio- moving funds and setting up Masternodes to maximize their passive income. With EAZY, investors can invest in Masternodes of their choice with the simplicity of just a few clicks. EAZY users can select a coin of their choice within the platform based of technical aspects such as ROI, daily rewards, etc, and set up a Masternode without ever having to open a command line.

With EAZY, investors will skip the process of constructing a Masternode from scratch, and spend more time doing research finding viable start up projects to invest in. EAZY will allow setup of an infinite number of Nodes for a Masternode project, all while paying a small setup and maintenance fee. Get detailed insights about the most important statistics of your favored Masternode projects on the go, all from the palm of your hand.

Our team is dedicated to build this platform and will pursue to grow it into a flagship product of the Masternode Management space.

-One click Masternode hosting allows users to launch a Masternode with ease- no technical knowledge required!

-Detailed monitoring and analytics of Masternode coins- Compare Masternodes live on EAZY!

-Shared Masternodes available to allow users to pool their Masternode coin holdings with other users to launch a Masternode- secured by smart contracts!

All services run automatically, including server setup, Masternode keys and outputs, balance information, reinvestments, and withdrawals, all safely within your EAZY account.

KEY FEATURES

EAZY Masternode Setup

One click Masternode hosting that eliminates the most common difficulties for Masternode investors.

EAZY Masternode Monitoring

Track all of your Masternodes in real time to make sure your investment is generating passive income. See important statistics such as ROI, active nodes, rewards, market cap, volume, and more!

EAZY Masternode Sharing

Can't afford your own Masternode? No problems! Join in with others to create a Masternode that will accurately distribute rewards- all powered through smart contracts!

EAZY Masternode Exchange

Want to switch to another project? No need to withdraw to an exchange! You will be able to trade your coins right through the app, so that way you can stay ahead of the curve when a new Masternode opportunity arises.

EAZY Masternode Watchlist and Alerts

Be notified when your favorite Masternode projects change in price, change collateral, or change in percentages for block rewards! Never get blindsided again when changes occur to the parameters of your Masternode investments.

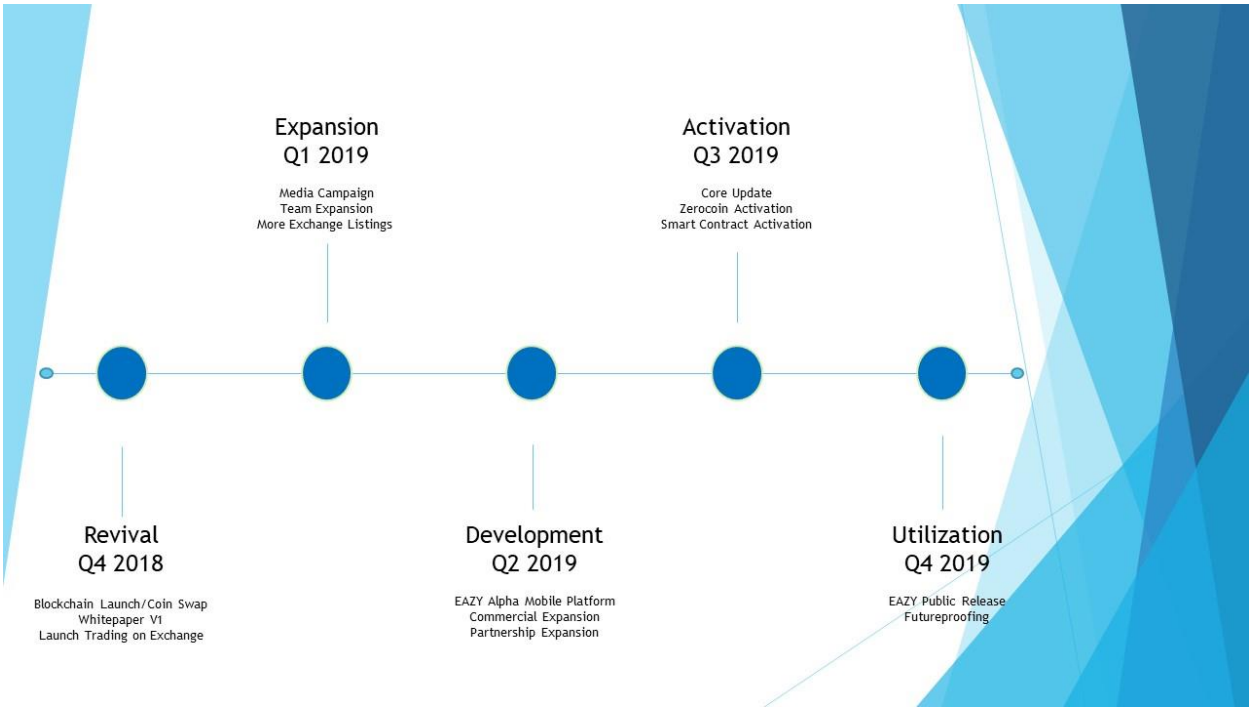
Masternode Verification

EAZY will work with new projects to verify the legitimacy of their project, as well as allow them to push updates to users on the EAZY platform to keep users up to date. We want users to have confidence investing in new projects without the fear of developers who have nefarious intentions.

Masternode Governance

EAZY provides decentralized governance to vote and improve of future development for Masternode holders.

ROADMAP



BLOCKCHAIN SPECIFICATIONS

NAME| EAZY

TICKER| EZY

TYPE| POS+Masternode

ALGO| Quark

BLOCKTIME| 60 Seconds

DIFFICULTY RETARGETING| Every Block

MAX SUPPLY| 33,528,000 EZY

PREMINE| 2,000,000 EZY (For Chain Swap+ Development)

SwiftTX| Active

ZEROCOIN| Block # TBA

Smart Contracts| TBA

Masternode Collateral|5000 EZY

PoS Rewards Breakdown

Phase	Block Height	Reward	Masternodes	Stakers
Phase 1	1000 - 9999	0.1 (pow)	-	-
Phase 2	10k - 19999	9.5	90%	10%
Phase 3	20k - 24999	12	90%	10%
Phase 4	25k - 49999	18	90%	10%
Phase 5	50k - 99999	14.5	90%	10%
Phase 6	100k - 249999	11.5	90%	10%
Phase 7	250k - 499999	8.5	90%	10%
Phase 8	500k - 999999	6.5	90%	10%
Phase 9	1M -2499999	5	90%	10%
Phase 10	2.5M -4999999	3.75	90%	10%
Phase 11	5M -7499999	3.25	90%	10%
Phase 12	7.5M -9999999	2.75	90%	10%
Phase Final	10000000+	2	90%	10%

ECOSYSTEM

EAZY is designed to be an efficient and stable store of value for investors as well as payment asset for our services. EAZY will be tradeable through our platform, as well as exchanges. We will provide the lowest cost Masternode hosting possible.

The Platform will be load balanced properly on cloud servers by core team engineers. Smart contracts will regulate shared Masternode pools and secure users funds from theft or third parties. By providing a user-friendly environment the need for highly technical skills is removed. No need to handle config files or change ports on your firewall.

EAZY is the main engine for our EAZY Mobile Masternode Management Platform and will create value through multiple use cases, as well as community adoption as a solution for Masternode Management. The EAZY economy is Community sources, and is focused on long-term sustainability by continuously improving upon the platform and transparency of the process to the EAZY community.

PRODUCT DEVELOPMENT

EAZY BLOCKCHAIN

EAZY is running on a fork of PIVX, which allows us to provide several features on our block chain. Features such as ZEROCOIN, SwiftTX, Masternodes, and POS through our wallet will be available. Smart contracts will be enabled for the Shared Masternode portion of our platform once developed.

EAZY MOBILE

EAZY Mobile is a paid user account providing the user with a wide range of features such as Masternode creation and management, Watchlists and alerts, Masternode statistics, and more.

EAZY EXCHANGE

EAZY Exchange is a service on the Mobile platform that will allow you to easily buy and sell various Masternode coins so that you can quickly move funds from one project to another, all while operating within the EAZY Ecosystem.

EAZY SHARED NODES

EAZY Shared Nodes is a service to allow a user to purchase a percentage of a Masternode in a safe manner within the EAZY platform, and to receive rewards based on their percentage. All powered through smart contracts.

CONCLUSION

EAZY is working towards a more user friendly experience when dealing with Masternodes. Our platform will not only make it easier to manage Masternodes, but also assist users to invest in reputable Masternode products. Masternodes are only at the beginning of their development with lots of improvements possible. Being able to transform this segment of the cryptocurrency sector gives us the motivation to create a universally streamlined experience for users.

We envision EAZY to become a staple in the Masternode space, and change the way people view Masternodes as a whole.
